

Evaluation Report for Category B, Subcategory B.3.11 Application

Application Number: 2016-2138
Application: New or Changes to Product Labels-New Pests
Product: MicroPro 200C-TS
Registration Number: 30196
Active ingredients (a.i.): Copper (present as basic copper carbonate)
PMRA Document Number: 2679014

Background

MicroPro 200C-TS (Reg. No. 30196) is source of copper that is mixed with a registered quaternary ammonium compound to form an ammoniacal copper quat (ACQ)-type heavy-duty wood preservative. It is registered for above-ground and ground contact uses.

Purpose of Application

The purpose of this Category B.3.11 application is to add pests (termites and decay fungi) on the MicroPro 200C-TS label.

Chemistry Assessment

Not required.

Health Assessments

Not required.

Environmental Assessment

Not required.

Value Assessment

The fungal decay claims sought in this application have been evaluated for MicroPro 200C-TS in a previous application (2009-0870). The results from four field trials supported the use of MicroPro 200C-TS to protect wood used in construction (ground contact and/or above ground structural and non-structural) against termites.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the value information provided in support of MicroPro 200C-TS. The information provided is sufficient to add the decay fungi and termite claims on the MicroPro 200C-TS label.
