

Evaluation Report for Category B, Subcategory B.3.11 Application (New or Changes to Product Label – New Pests)

Application Number: 2016-5357
Application: Category B.3.11 (New or changes to product label – New pests)
Product: Liberty 200 SN Herbicide
Registration Number: 25337
Active Ingredient (a.i.): 200 g/L glufosinate ammonium
PMRA Document Number: 2712143

Background

Liberty 200 SN Herbicide is registered for control of a broad spectrum of grasses and broadleaf weeds in LibertyLink canola, LibertyLink corn, and LibertyLink soybean. For specific details of uses, application rates, timings, and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to include the claims of control and enhanced control of jimsonweed when Liberty 200 SN is applied alone at 2.5 L/ha and in tank mix with ammonium sulphate (AMS), respectively.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

Jimsonweed is a competitive annual broadleaf weed well established in southwestern Ontario where it is found in soybean fields. It has been found in canola fields in Alberta since 2015, likely the results of contaminated seed. The presence of jimsonweed in canola seeds is cause for concern. The registrant indicated that “*there is near-zero tolerance for jimsonweed in canola sold as seed*”.

Value information, which included data from field trials conducted in the USA, Australia, South Africa, Columbia, and Italy, demonstrated that the application of Liberty 200 SN Herbicide at 2.5 L/ha provided acceptable control of jimsonweed. The inclusion of AMS in the spray tank numerically increased the level of jimsonweed control.

Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Liberty 200 SN Herbicide to include the claims of control and enhanced control of jimsonweed.
