

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-2524
Application: New or Changes to Product Labels – Tank Mixes
Product: Vibrance Ultra Potato
Registration Number: 33171
Active ingredients (a.i.): Difenoconazole, Mandipropamid and Sedaxane
PMRA Document Number: 3476247

Background

Vibrance Ultra Potato (Reg. No. 33171; registered by Syngenta Canada Inc.) is a commercial potato seed treatment fungicide containing the active ingredients difenoconazole (77.2 g/L), sedaxane (77.2 g/L), and mandipropamid (154.3 g/L).

Purpose of Application

The purpose of this application is to add the general tank mix statement to the product label, Vibrance Ultra Potato, in accordance with the latest PMRA guidance on tank mix labelling.

Chemistry, Health and Environmental Assessment

A chemistry assessment was not required since there was no change to product chemistry. Health and environment assessments were not required since the use pattern remained unchanged.

Value Assessment

The requested changes to the product label have been verified for inconsistencies with PMRA guidance on tank mix labelling and any other incongruities with existing wording. The value of the label amendments was determined to be acceptable. The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the requested label amendments to be acceptable.
