

## Evaluation Report for Category B, Subcategory 3.10 Application

**Application Number:** 2023-2348  
**Application:** New or Changes to the Product Label – Tank Mixes  
**Applicant:** UPL AgroSolutions Canada Inc.  
**Product:** TriCor LQ Herbicide  
**Registration Number:** 33911  
**Active ingredient (a.i.):** 480 g/L Metribuzin  
**PMRA Document Number:** 3513473

### Purpose of Application

The purpose of this application was to amend the label as follows:

- (1) Add the general tank mixing statement as per the published PMRA Guidance Document – Tank Mix Labelling
- (2) Include the supplement products, Ohm and Wave, as tank mix partners for application to labelled crops
- (3) Replace Pursuit (240 g a.e./L) with a general reference of “*imazethapyr products*”, and replace Glyphos AU Soluble Concentrate with a generic reference of “*glyphosate products*”.

### Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

### Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with associated cost- and time-savings by the user.

Other label amendments, including the general reference to “*glyphosate products*” and “*imazethapyr products*” and the addition of Ohm and Wave as tank mix partners for application on labelled crops were supported based on precedent registrations.

## **Conclusion**

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the requested amendments to the TriCor LQ Herbicide label to be acceptable.
