

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number:	2023-3527
Application:	New or Changes to Product Labels – Tank Mixes
Applicant:	Syngenta Canada Inc.
Product:	Scholar 230SC Fungicide
Registration Number:	29528
Active ingredient (a.i.):	Fludioxonil
PMRA Document Number:	3521020

Background

Scholar 230SC Fungicide (Reg. No. 29528; registered by Syngenta Canada Inc.) is a suspension fungicide containing the active ingredient fludioxonil (230 g/L).

Purpose of Application

The purpose of this application is to add the general tank mix statement to the product label, Scholar 230SC Fungicide, in accordance with the latest PMRA guidance on tank mix labelling.

Chemistry, Health and Environmental Assessment

A chemistry assessment was not required since there was no change to product chemistry. Health and environment assessments were not required since the use pattern remained unchanged.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023). The value of the label amendments was determined to be acceptable. The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the requested label amendments to be acceptable.
