

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-6072
Application: Category B.3.10 (New or Changes to the Product Label – Tank Mixes)
Product: Forum Fungicide
Registration Number: 32026
Active ingredient (a.i.): Dimethomorph
PMRA Document Number: 3560650

Background

Forum Fungicide (Reg. No. 32026; Registrant; BASF Canada Inc.) is a suspension concentrate conventional fungicide containing 500 g/L dimethomorph (DME) as its active ingredient.

Purpose of Application

The purpose of the subject application is to add the general tank mix statement to the product label of Forum Fungicide, in accordance with the latest PMRA guidance on tank mix labelling, and remove recommendations for specific tank mix partners.

Chemistry, Health and Environmental Assessment

A chemistry assessment was not required since there was no change to product chemistry. Health and environment assessments were not required since the use pattern is unchanged.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The value of the label amendments was determined to be acceptable. The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the inclusion of the general tank mixing statement to be acceptable on the product label.
