Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on mustard to the product label of Equinox EC Herbicide, containing technical grade tepraloxymid. The specific uses approved in Canada are detailed on the label of Equinox EC Herbicide, *Pest Control Products Act* Registration Number 27603.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 22 March 2010, Proposed Maximum Residue Limit PMRL2010-22, *Tepraloxymid*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and is in addition to the MRLs already established for tepraloxymid.

Established Maximum Residue Limit for Tepraloxymid

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Tepraloxymid	<i>(EZ)-(RS)-2-{1-[(2E)-3-chloroallyloxyimino]propyl}-3-hydroxy-5-perhydropyran-4-ylcyclohex-2-en-1-one</i> , including metabolites convertible to 3-perhydropyran-4-ylglutaric acid and 3-hydroxy-3-perhydropyran-4-ylglutaric acid, as parent equivalent	0.3	Mustard seeds (oilseed type)

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
