

Evaluation Report for Category B Subcategory 3.2 Application

Application Number: 2010-1686
Application: B.3.2 – Change Application Timing
Product: Equinox EC Herbicide
Registration Number: 27603
Active ingredients (a.i.): Tepraloxydim (TPA)
PMRA Document Number : 1969258

Purpose of Application

The purpose of this application was to amend the registration of Equinox EC Herbicide to extend and harmonize (1) the crop stage at application for Clearfield lentils with conventional lentils and (2) the crop stage at application for Clearfield canola quality *Brassica juncea* with Clearfield canola.

Chemistry, Health and Environmental Assessment

Chemistry, health and environmental assessments were not required for this application.

Value Assessment

Scientific rationales in lieu of field research data were submitted for review. Based on the evidence made available, extending and harmonization of (1) the crop stage at application for Clearfield lentils with conventional lentils from the 1-6 node stage to the 1-9 node stage and (2) the crop stage at application for Clearfield canola quality *Brassica juncea* with Clearfield canola from the emergence to 6-leaf stage to the emergence to rosette stage (prior to bud and flower formation) were supported.

Conclusion

The PMRA has completed an assessment of this application and has found the information to be sufficient to amend the registration of Equinox EC Herbicide to extend and harmonize (1) the crop stage at application for Clearfield lentils with conventional lentils and (2) the crop stage at application for Clearfield canola quality *Brassica juncea* with Clearfield canola.

References

PMRA # 1899733: Waiver request for the exemption from Part 10 value for 1) extending and harmonizing of the crop stage at application for Clearfield lentils with conventional lentils and 2) extending and harmonizing of the crop staging at application for Clearfield juncea with Canola (all types).
