

Evaluation Report for Category C, Subcategory C.3.9 Application (New or Changes to Level of Control)

Application Number: 2010-3847
Application: Category C, Subcategory C.3.9 Application (New or Changes to Product Label – Level of Control)
Product: Express Pro Herbicide
Registration Number: 29212
Active ingredients (a.i.): 42.9% tribenuron-methyl and 8.6% metsulfuron methyl
PMRA Document Number : **1974180**

Background

Express Pro Herbicide is a co-formulation containing 42.9% tribenuron methyl (Group 2 Herbicide) and 8.6% metsulfuron methyl (Group 2 Herbicide) and is registered to be applied in combination with glyphosate herbicides for control of grasses and broadleaf weeds and residual control of cleavers, dandelion, narrow leaved hawk's beard, and volunteer canola in summerfallow and on fields to be planted to wheat (spring, durum, and winter) and spring barley. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to change the weed control stage for volunteer canola from “any stage” to “up to 15 cm”.

Chemistry Assessment

A chemistry assessment was not required as there was no change to product chemistry.

Health and Environmental Assessments

Health and environmental assessments were not required as there was no change to the product formulation, application rate and method, and use pattern.

Value Assessment

Value data were not required when narrowing down growth stage of a pest to be controlled.

Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Express Pro Herbicide to change the weed control stage for volunteer canola from “any stage” to “up to 15 cm”.
