

Evaluation Report for Category B, Subcategory 4.6 Application

Application Number: 2016-1597
Application: B.4.6. - Address requirements of full registration
Product: TPM Flowable 25% Undyed Liquid Fungicide Seed Treatment
Registration Number: 31761
Active ingredients (a.i.): Thiophanate-methyl
PMRA Document Number: 2705925

Purpose of Application

The purpose of this application was to address the remaining chemistry requirements for TPM Flowable 25% Undyed Liquid Fungicide Seed Treatment. This end-use product was originally registered under submission 2013-3192.

Chemistry Assessment

TPM Flowable 25% Undyed Liquid Fungicide Seed Treatment is a solution containing thiophanate-methyl at a nominal concentration of 296.5 g/L. This end-use product has a density of 1.186 g/mL and pH of 7.1. The chemistry requirements for this product included the provision of corrosion characteristics and storage stability studies. Data to fulfill these requirements were provided, reviewed and found to be acceptable. As such, the chemistry requirements for TPM Flowable 25% Undyed Liquid Fungicide Seed Treatment have been fulfilled.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The PMRA has reviewed the information provided in support of this application. Based on the results of this review, the requirements for this product have been addressed.
