

Evaluation Report for Category B, Subcategory 3.1 Application

Application Number: 2019-2543
Application: Changes to Product Labels - Application Rate Increase
Product: ACTICIDE SPX MICROBIOCIDE LIQUID
Registration Number: 21427
Active ingredients (a.i.): 2-methyl-4-isothiazolin-3-one and
5-chloro-2-methyl-4-isothiazolin-3-one
PMRA Document Number : 3062798

Purpose of Application

The purpose of this application was to increase the use rate of ACTICIDE SPX MICROBIOCIDE LIQUID as a material preservative in paints, coatings, lattices, adhesives, inks, building materials and metalworking fluids.

Chemistry Assessment

A chemistry assessment was not required for this application.

Health Assessments

The toxicology studies submitted as part of these submissions were evaluated. It was determined that this new information would not impact the previously established toxicology reference value for use in the quantitative dermal sensitization risk assessment for this combination of active ingredients.

Dermal sensitization risks of concern were not identified for occupational workers handling metalworking fluids and secondary handlers (professionals and residential) applying paints/coatings and building materials treated at the maximum application rates.

A dietary exposure assessment was not required for this application.

Environmental Assessment

No new environmental data were submitted to support these submissions and none are required. No additional risk to the environment is expected from the increase in the maximum application rates for ACTICIDE SPX MICROBIOCIDE LIQUID.

Value Assessment

A value assessment was not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided and has found the information sufficient to increase the use rate of ACTICIDE SPX MICROBIOCIDE LIQUID as a material preservative in paints, coatings, lattices, adhesives, inks, building materials and metalworking fluids.
