

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-3115
Application: New or Changes to the Product Label – Tank Mixes
Product: Kasumin 2L Bactericide
Registration Number: 30591
Active ingredient (a.i.): Kasugamycin, present as hydrochloride hydrate, 2.00%
PMRA Document Number: 3521072

Background

Kasumin 2L Bactericide (Reg. No. 30591; registrant UPL AgroSolutions Canada Inc.) is a commercial liquid bactericide containing kasugamycin, present as hydrochloride hydrate, 2.00%, as the active ingredient.

Purpose of Application

The purpose of the subject application is to add a tank mix recommendation to the Kasumin 2L Bactericide label. Two supplement products, Ohm Aquatic Plant Extract and Wave Aquatic Plant Extract, are proposed as tank mix partners.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A rationale based on the ability of treated crops to better withstand biotic stresses, in conjunction with precedent registrations, was accepted in support of the value of the specific tank mix recommendations with the two supplement products.

Conclusion

The PMRA has completed an evaluation of the subject application and has found the information sufficient to amend the registration of Kasumin 2L Bactericide to include the requested label amendment.
