

Evaluation Report for Category C, Subcategory C.3.10 Application (New or Changes to Product Label - Tank Mixes)

Application Number: 2009-2858
Application: Category C, Subcategory C.3.10 Application (New or Changes to Product Label - Tank Mixes)
Product: Elim EP Herbicide 25% Dry Flowable
Registration Number: 23518
Active ingredients (a.i.): Rimsulfuron
PMRA Document Number : 1842520

Background

Elim EP Herbicide 25% Dry Flowable containing 25% rimsulfuron is a Group 2 Herbicide registered for either pre- or post-emergence application to field corn in Eastern Canada and the Red River Valley region of Manitoba for control of annual grasses, quackgrass, redroot pigweed, and lamb's quarters. Elim EP Herbicide 25% Dry Flowable can also be used in combination with certain broadleaf herbicides for broad spectrum weed control. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to amend the registration of Elim EP Herbicide 25% Dry Flowable to group all glyphosate tankmix partners under a general term "glyphosate".

Chemistry Assessment

A chemistry assessment was not required as there was no change to product chemistry.

Health Assessment

A health assessment was not required as there was no change to the product formulation and use pattern.

Environmental Assessment

An environmental assessment was not required as the tank mixture of glyphosate and rimsulfuron are presently registered for the same uses.

Value Assessment

Based on the rationale provided by the applicant and the scope of the glyphosate database, grouping all glyphosate tankmix partners on the Elim EP Herbicide 25% Dry Flowable label under a general term “glyphosate (present as potassium salt, isopropylamine salt, or di-ammonium salt)” can be supported from a value standpoint.

Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Elim EP Herbicide 25% Dry Flowable to group all glyphosate tank mixture partners on the Elim EP Herbicide 25% Dry Flowable label under a general term “glyphosate (present as potassium salt, isopropylamine salt, or di-ammonium salt)”.
