

Evaluation Report for Category C, Subcategory C.3.10 Application (New or Changes to Tank Mix)

Application Number: 2013-4206
Application: Category B.3.10 (new or changes to product label – tank mixes)
Product: Pardner Herbicide
Registration Number: 18001
Active ingredients (a.i.): 280 g/L bromoxynil
PMRA Document Number : 2389423

Background

Pardner Herbicide containing 280 g/L bromoxynil is registered for selective post-emergence control of broadleaf weeds in small grain cereals, flax, corn, canary seed, garlic, onion, seedling and established alfalfa, seedling grasses, forage and grain sorghum, forage and grain millet, and zero till. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to replace Ultim 25 DF with Ultim 75 DF in labelled tank mixtures: Pardner + Ultim 25 DF and Pardner + atrazine + Ultim 25 DF.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, and use site and pattern.

Value Assessment

Value information in the form of scientific rationale was submitted for review. Replacing Ultim 25 DF with Ultim 75 DF in the labeled tank mixtures was supported since Ultim 75 DF was previously determined to be agronomically similar to Ultim 25 DF.

Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Pardner to replace Ultim 25 DF with Ultim 75 DF in the labeled tank mixtures.
