

## **Warrior Insecticide**

### **Evaluation Report for Category B, Subcategory B.3.11 Application**

**Application Number:** 2015-1912  
**Application:** Category B, Subcategory B.3.11 (addition of new pest)  
**Product:** Warrior Insecticide  
**Registration Number:** 26837  
**Active ingredients (a.i.):** lambda-cyhalothrin (CYH)  
**PMRA Document Number:** 2573555

#### **Background**

Warrior Insecticide has been registered since October 2001. This product is registered for use on a variety of agricultural crops and pests.

#### **Purpose of Application**

The purpose of this application is to add control of cutworm on canola, mustard and flax, at 83 mL product/ha, to the label of Warrior Insecticide 120EC (Reg. No. 26837).

#### **Chemistry, Health and Environmental Assessments**

A chemistry assessment was not required because there was no change to product chemistry. Health and environmental assessments were not required because the use pattern, including host crops, timings and maximum application rate of lambda-cyhalothrin remained unchanged.

#### **Value Assessment**

Warrior Insecticide is registered to control a variety of insects on canola and mustard at 83 mL product/ha. It is registered for use on flax to control grasshoppers at 63-83 mL product/ha. Warrior Insecticide is also registered to control cutworms on corn, legumes, lettuce, tomato at 83 mL product/ha. Therefore, it is expected that Warrior Insecticide will be effective against cutworm on canola, mustard and flax at 83 mL product/ha.

#### **Conclusion**

The PMRA has completed an evaluation of the subject application and has found the information sufficient to add control of cutworms on canola, mustard and flax at 83 mL product/ha by ground application to the Warrior Insecticide label.
