

## Evaluation Report for Category B, Subcategory 4.1 Application

**Application Number:** 2015-5386  
**Application:** Conversion to full registration without consultation  
**Product:** TwinGuard Insecticide  
**Registration Number:** 31442  
**Active ingredients (a.i.):** Sulfoxaflor and Spinetoram  
**PMRA Document Number :** 2571924

### Background

TwinGuard Insecticide (Registration Number 31442; guarantee 20% sulfoxaflor and 20% spinetoram) was first granted a conditional registration for use in Canada in September 2014. TwinGuard Insecticide is used for control or suppression of various insect pests on pome fruit, stone fruit and potato.

### Purpose of Application

The purpose of this application was to convert the status of the commercial end-use product, TwinGuard Insecticide, from conditional to full registration.

The original registration decision was contingent on the registration status of the conditionally registered active ingredient, sulfoxaflor (Isoclast Active; Registration Number 30824). Sulfoxaflor was converted to full registration status in June 2015 under application 2013-6561. The detailed review for the conversion of sulfoxaflor can be found in the Proposed Registration Decision PRD2015-08 – *Sulfoxaflor* and Registration Decision RD2015-09 – *Sulfoxaflor*.

With the conversion of sulfoxaflor to full registration status, all outstanding requirements associated with TwinGuard Insecticide have now been addressed.

### Chemistry, Health, Environmental and Value Assessments

Chemistry, health, environmental and value assessments were not required for this application.

### Conclusion

The PMRA has completed a review of all available information and found it sufficient to support conversion of TwinGuard Insecticide to full registration status.
