

## Evaluation Report for Category B, Subcategory 4.6 Application

**Application Number:** 2015-3225  
**Application:** B.4.6 - Address the Data Requirements for Full Registration  
**Product:** CGA279202 50 WG Fungicide  
**Registration Number:** 30427  
**Active ingredients (a.i.):** Trifloxystrobin  
**PMRA Document Number :** 2575803

### Purpose of Application

The purpose of this application was to address the data requirement (additional efficacy data) for full registration of CGA279202 50 WG Fungicide.

### Chemistry, Health and Value Assessment

Chemistry, health and value assessments were not required for this application.

### Value Assessment

Six trials conducted on potato and tomato in South Africa and Mexico between 2004 and 2014 were reviewed to address the data requirements of full registration. Combined significant reductions of both the incidence and severity of the disease indicated control of early blight on potato and tomato. Since the disease is caused by the same pathogen on other susceptible fruiting vegetable crops and manifests in the same way, the claim was confirmed for the following crops: eggplant, ground cherry, pepino, pepper and tomatillo. The data requirements of registration have been fulfilled.

### Conclusion

The PMRA has reviewed the information provided in support of this application. Based on this review, the data requirements for full registration have been addressed.
