

Evaluation Report for Category B, Subcategory 2.2 Application

Application Number: 2015-6041
Application: Change to end-use product chemistry-Form of technical grade active ingredient
Product: Integral
Registration Number: 29453
Active ingredients (a.i.): *Bacillus amyloliquefaciens* strain MBI 600
PMRA Document Number: 2697975

Background

The commercial end-use product, Integral (Registration Number 29453), was first registered for use in Canada in 2010 as a fungicide on canola and soybeans seeds.

Purpose of Application

The purpose of this application was to change the microbial pest control agent (MPCA) used in Integral.

Product Characterization and Analysis

Data and information were submitted to change the species of the MPCA from *Bacillus subtilis* strain MBI 600 to *Bacillus amyloliquefaciens* strain MBI 600. The data and information supported the change in the taxonomic designation of the MPCA. No additional information or data are required to complete the product characterization and analysis database for Integral.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The PMRA has completed a review of all available information in support of Integral and found it sufficient to approve the change in the taxonomic designation of the MPCA.
