

Evaluation Report for Category B, Subcategory 3.13 Application

Application Number: 2018-6017
Application: Changes to Product Label - Precautions
Product: Altus Insecticide
Registration Number: 33176
Active ingredient (a.i.): Flupyradifurone
PMRA Document Number: 3013828

Purpose of Application

The purpose of this application was to amend the precautions and the personal protective equipment (PPE) on the label of Altus Insecticide.

Health Assessments

A new primary eye irritation study for Altus Insecticide was submitted. The eye irritation scores obtained from the study were more severe than those from the previously submitted eye irritation study, resulting in an increase in the acute hazard classification for eye irritation. Based on the results of the new study, Altus Insecticide is classified as moderately irritating to the eyes. The signal word, hazard statement and precautions on the label have been updated to reflect the revised hazard classification.

No risks of concern are expected when workers follow label directions and wear personal protective equipment as stated on the label.

A dietary exposure assessment was not required for this application.

Chemistry, Value and Environmental Assessments

Chemistry, value and environmental assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to support the amendments to the label of Altus Insecticide.
