

Evaluation Report for Category B, Subcategory 1.1 Application

Application Number: 2020-5305
Application: Changes to ISP Product Chemistry – New Source (site) same registrant
Product: BioCeres EC
Registration Number: 33493
Active ingredient (a.i.): *Beauveria bassiana* strain ANT 03
PMRA Document Number: 3222470

Purpose of Application

The purpose of this application was to add additional formulating sites to the registration for BioCeres EC.

Product Characterization and Analysis

Sufficient information were provided to support the addition of two new formulating sites for BioCeres EC. The information on the formulation process and quality assurance protocols employed by these new formulating sites as well as the potency information for lots of BioCeres EC produced by these formulating sites were adequate to demonstrate the end-use product formulated at these sites are equivalent to the registered end-use product.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed a review of the available information and has found it sufficient to support the registration of additional formulating sites for BioCeres EC.
