

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-0634
Application: New or Changes to the Product Label – Tank Mixes
Product: AIM EC Herbicide
Registration Number: 28573
Active ingredient (a.i.): 240 g/L Carfentrazone-ethyl
PMRA Document Number: 3470020

Purpose of Application

The purpose of the application is to amend the Aim EC Herbicide label to include a tank mix with Spitfire 50 SC Herbicide + glyphosate prior to planting spring barley, oats and spring wheat (including durum) or as an initial summerfallow treatment and as well as a to add the new general tank mix statement.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

Value information provided in support of the new tank mix included a rationale and precedent registrations, and was found to be supportive. A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023). The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops.

Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with associated cost- and time-savings by the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the changes to be acceptable.
