

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-2776
Application: New or Changes to the Product Label – Tank Mixes
Product: Elevate 50 WDG Fungicide
Registration Number: 25900
Active ingredient (a.i.): Fenhexamid
PMRA Document Number : 3502921

Background

Elevate 50 WDG Fungicide (Reg. No. 25900; registrant UPL AgroSolutions Canada Inc.) is a commercial wettable dispersible granule formulation fungicide containing 50% fenhexamid.

Purpose of Application

The purpose of the subject application is to add tank mixes with two biostimulant products, Ohm Aquatic Plant Extract and Wave Aquatic Plant Extract, to the product label.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the proposed tank mix partners is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The tank mixes with the identified biostimulants are expected to enhance the ability of the crop to withstand biotic stresses caused by disease and subsequent crop recovery.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the addition of tank mixtures with Ohm Aquatic Plant Extract and Wave Aquatic Plant Extract to be acceptable on the product label.
