

## **Select Plus**

### **Evaluation Report for Category B Streamlined, Subcategory 3.10 Application**

**Application Number:** 2023-1969  
**Application:** Category B, Subcategory 3.10 Application (new or changes to product labels – tank mixes)  
**Product:** Select Plus  
**Registration Number:** Reg. No. 34744  
**Active ingredients (a.i.):** clethodim and quizalofop-p-ethyl  
**PMRA Document Number:** 3516634

#### **Purpose of Application**

The purpose of this application was to amend the registration of Select Plus per the following:

1. Where Buctril M is listed, add “bromoxynil + MCPA” as a tank mix partner (in flax); and
2. Where Lontrel 360 Herbicide is listed, add Lontrel XC Herbicide & Lontrel 72 Herbicide (in flax and canola).

#### **Chemistry, Health and Environmental Assessments**

A chemistry assessment was not required since there was no change to product chemistry. Health and Environmental assessments were not required since the use pattern, including host crops, application rates and timings of the product, remained unchanged.

#### **Value Assessment**

Labelling the general active ingredient names for bromoxynil + MCPA as tank mix partners for use with Select Plus, as well as other Lontrel end-use products, allows growers to select their preferred and/or available bromoxynil + MCPA and Lontrel herbicide to use with Select Plus. Tank mixing allows growers to apply the tank mix partners at the same time, reducing labour, fuel consumption, soil compaction and crop damage, and helps manage herbicide resistance.

A rationale, in conjunction with precedent product registrations, demonstrated that acceptable value (efficacy and crop tolerance) would be expected when Select Plus is applied in tank mixture with bromoxynil + MCPA and select Lontrel herbicide end-use products.

#### **Conclusion**

The PMRA has completed an evaluation of the subject application and has found the information sufficient to amend the registration of Select Plus to include the requested label amendments.
