

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-7185

Application: New or Changes to Product Labels – Tank Mixes

Applicant: Bayer CropScience Inc. **Product:** USF0728 325 SC Fungicide

Registration Number: 31435

Active ingredients (a.i.): Prothioconazole and trifloxystrobin

PMRA Document Number: 3578820

Background

USF0728 325 SC Fungicide (Reg. No. 31435; registered by Bayer CropScience Inc.) is a suspension fungicide containing the active ingredients prothioconazole (175 g/L) and trifloxystrobin (150 g/L).

Purpose of Application

The purpose of this application is to add the general tank mix statement to the product label, USF0728 325 SC Fungicide, in accordance with the latest PMRA guidance on tank mix labelling.

Chemistry, Health and Environmental Assessment

A chemistry assessment was not required since there was no change to product chemistry. Health and environment assessments were not required since the use pattern remained unchanged.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The value of the label amendments was determined to be acceptable. The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the requested label amendments to be acceptable.
