

Evaluation Report for Category B, Subcategory 2.3 Application

Application Number: 2009-1256
Application: B.2.3-Changes to EP Product Chemistry-Identity of Formulants
Product: Vet Kem Ovitrol Dual Action Collar for Cats and Kittens
Registration Number: 28598
Active ingredients (a.i.): Propoxur (BAY), (S)-Methoprene (MPR)
PMRA Document Number: 2029348

Purpose of Application

The purpose of this application was to amend the formulation.

Chemistry Assessment

Vet Kem Ovitrol Dual Action Collar for Cats & Kittens is formulated as a slow releasing collar containing the active ingredients (S)-methoprene and propoxur at a nominal concentration of 2.10% and a minimum concentration of 10.0% respectively. The formulation changes were found to be chemically equivalent to the precedent formulation.

Health Assessments

The amendments in the end use product are not expected to alter the toxicity profile of the product. A food exposure assessment was not required for this application. The potential exposure to the active ingredients propoxur or (S)-methoprene is not expected to exceed exposure from precedent formulation. The formulation changes are supported.

Environmental Assessment

An environmental assessment was not required for this application.

Value Assessment

The formulation changes are not expected to impact efficacy of the product.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided and has found the information sufficient to amend the formulation.
