

Evaluation Report for Category B, Subcategory 3.13 Application

Application Number: 2011-4005
Application: New of Changes to Product Labels - Precautions
Product: Concert Fungicide
Registration Number: 29642
Active ingredients (a.i.): Propiconazole and Chlorothalonil
PMRA Document Number: 2213858

Purpose of Application

The purpose of this application was to update the toxicological label statements of the new variant of Concert Fungicide that was registered under application number 2010-3528.

Health Assessments

Concert Fungicide is of low acute toxicity via the oral and dermal routes of exposure in rats. It is moderately toxic by the inhalation route in rats. It is corrosive to the eye and moderately irritating to the skin of the rabbit. It is a potential skin sensitizer in guinea pigs, based on a previous toxicology review of the registered product. Residue and occupational exposure assessments were not required for this submission.

Chemistry, Environmental and Value Assessments

Chemistry, environmental and value assessments were not required for this submission.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided in support of the proposed label changes to Concert Fungicide, and has found the information sufficient to amend the product label.
