

Evaluation Report for Category C, Subcategory B.3.10 Application (New Tank Mixes)

Application Number: 2013-6936

Application: Category B, Subcategory B.3.10 (new tank mixes)

Product: Tundra Herbicide **Registration Number:** 29367

Active ingredients (a.i.): 15.5 g/L pyrasufotole, 87.5 g/L bromoxynil, 46 g/L fenoxaprop-p-

ethyl

PMRA Document Number : 2404778

Background

Tundra Herbicide is a selective herbicide registered for post-emergence control or suppression of grassy and broadleaf weeds in spring wheat, durum wheat and spring barley. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to amend registration of Tundra Herbicide to include a control claim for stork's bill when applied in tank mix with 280 g ae/ha 2,4-D Ester Herbicide + ammonium sulphate (AMS) in spring wheat, durum wheat and spring barley.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

The information submitted for review in support of the value requirement included data from four field trials conducted in Canada. The results indicate that Tundra Herbicide controls stork's bill when applied in tank mix with 2,4-D Ester + AMS. The field trials also indicate an acceptable level of crop tolerance. Stork's bill is an annual or winter annual weed with relatively few chemical control options. The option to add 2,4-D Ester + AMS as a tank mix partner will provide growers a one-pass opportunity to control the broad range of weeds controlled by Tundra Herbicide alone including stork's bill..

Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Tundra Herbicide to include a control claim for stork's bill when applied in tank mix with 2,4-D Ester + AMS in spring wheat, durum wheat and spring barley.
