

Evaluation Report for Category B, Subcategory 3.7 Application

Application Number: 2016-4151
Application: B.3.7 - Change Pre-Grazing Interval
Product: Starane II Herbicide
Registration Number: 29463
Active ingredients (a.i.): Fluroxypyr
PMRA Document Number: 2714784

Purpose of Application

The purpose of this application was to change the pre-grazing interval from 3 days to 0 days for pasture and rangeland uses on the labels of Starane II Herbicide.

Health Assessments

Previously reviewed residue data from field trials conducted in/on grasses were reassessed in support of the change to the grazing interval. The change in pre-grazing interval will not result in residues of fluroxypyr that exceed the established MRLs for edible livestock matrices and will not pose health risks of concern to any segment of the population, including infants, children, adults and seniors.

Chemistry, Environmental and Value Assessments

Chemistry, environmental and value assessments were not required for this application.

Conclusion

PMRA has reviewed the information provided in support of the change to the pre-grazing interval. Based on the results of this review, the change to pre-grazing interval is acceptable.
