

## Evaluation Report for Category B, Subcategory 2.3, 2.4 Application

**Application Number:** 2021-2953  
**Application:** Changes to Product Chemistry: Identity and Proportion of Formulants  
**Product:** Everest 3.0 AG Herbicide  
**Registration Number:** 33258  
**Active ingredient (a.i.):** Flucarbazone (present as flucarbazone-sodium)  
**PMRA Document Number :** 3300405

### Purpose of Application

The purpose of this application was to add an alternate formulation to Everest 3.0 AG Herbicide.

### Chemistry Assessment

Everest 3.0 AG Herbicide is formulated as a suspension containing flucarbazone at 200 g/L, present as flucarbazone-sodium. This end-use product has a density of 1.1049-1.1066 g/mL and pH of 6.64 for a 1% dilution. The required chemistry data for Everest 3.0 AG Herbicide have been provided, reviewed and found to be acceptable.

### Health Assessments

The new formulation was considered toxicologically equivalent and new toxicity data were not required. Everest 3.0 AG Herbicide is of low acute oral, dermal and inhalation toxicity. It is severely irritating to the eye and slightly irritating to the skin of the rabbit. It is a skin sensitizer in the mouse.

Occupational and residue assessments were not required for this application.

### Environmental Assessment

The addition of a new alternate formulation for Everest 3.0 AG Herbicide does not pose any additional risk to the environment when used according to the label.

### Value Assessment

A value assessment was not required for this application.

### Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to add an alternate formulation to Everest 3.0 AG Herbicide.
