

Evaluation Report for Category B, Subcategory B.3.10 Application (New or Changes to Product Label – Tank Mixes)

Application Number: 2023-1889
Application: Category B.3.10 (New or changes to product label – Tank mixes)
Product: Horizon NG Herbicide
Registration Number: 29089
Active Ingredient (a.i.): 60 g/L clodinafop-propargyl
PMRA Document Number: 3530048

Purpose of Application

The purpose of this application is to amend the registration of Horizon NG Herbicide to include the amendments that are listed below:

1. Add the general tank mix statement as per the published PMRA Guidance Document – Tank Mix Labelling.
2. Include additional tank mixing statements to accompany the general tank mixing statement above.
3. Remove tank mix options and exclusionary statement.
4. Replace tank mix options with similar products that are registered relatively recent.
5. Add new tank mix options.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mix statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling.

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated weed management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Other label amendments, including addition of additional tank mixing statements and updates on tank mix options, are supported based on rationales and relevant precedent registrations with the required label amendments.

An assessment to remove tank mix options and exclusionary statement is not required.

Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to support the requested label amendments.
