

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-3117
Application: Category B.3.10 (New or Changes to the Product Label – Tank Mixes)
Product: Maestro 80 WSP
Registration Number: 33488
Active ingredient (a.i.): Captan, 80%
PMRA Document Number : 3519872

Background

Maestro 80 WSP (Reg. No. 33488; registrant UPL Agrosolutions Canada Inc.) is a commercial fungicide formulated as water soluble pouches containing the active ingredient captan, 80%.

Purpose of Application

The purpose of the subject application is to add a tank mix recommendation to the Maestro 80 WSP label. Two supplement products, Ohm Aquatic Plant Extract and Wave Aquatic Plant Extract, are proposed as tank mix partners.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A rationale based on the ability of treated crops to better withstand biotic stresses, in conjunction with precedent registrations, was accepted in support of the value of the specific tank mix recommendations with the two supplement products.

Conclusion

The PMRA has completed an evaluation of the subject application and has found the information sufficient to amend the registration of Maestro 80 WSP to include the requested label amendment.
