

## Evaluation Report for Category B, Subcategory 3.10 Application

**Application Number:** 2023-3108  
**Application:** Category B.3.10 (New or Changes to the Product Label – Tank Mixes)  
**Product:** Blazer  
**Registration Number:** 23315  
**Active ingredient(s) (a.i.):** 240 g/L acifluorfen, present as sodium salt  
**PMRA Document Number:** 3502857

### Purpose of Application

The purpose of this application was to amend the label to include the supplement products, Ohm and Wave, as tank mix partners.

### Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to the product formulation, host crops, application rates, methods and timings.

### Value Assessment

The addition of Wave as a tank mix partner for application to soybean was supported based on precedent registrations and since the application windows for Blazer and Wave overlap. As the labelled application window of Ohm does not overlap with Blazer, it was not supported for labelling.

### Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has determined that the supplement product, Wave, is acceptable as a tank mix partner.
