

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-7117
Application: Category B.3.10 (New or Changes to Product Labels-Tank Mixes)
Product: Streptomycin 17
Registration Number: 10305
Active ingredient (a.i.): Streptomycin sulfate (25.2%)
PMRA Document Number: 3583674

Background

Streptomycin 17 (Reg. No. 10305; registrant Loveland Products Canada Inc.) is a commercial bactericide containing the active ingredient streptomycin sulfate at 25.2%.

Purpose of Application

The purpose of this application was to add the general tank mixing statement to the product label.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with associated cost- and time-savings for the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the inclusion of the general tank mixing statement to be acceptable on the product label.
