Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on potato and sweet corn to the product labels of Bravo 720 and Bravo Ultrex, containing technical grade chlorothalonil. The specific uses approved in Canada are detailed on the labels of Bravo 720 and Bravo Ultrex, *Pest Control Products Act* Registration Number 29225 and 29306, respectively.

Corresponding maximum residue limits (MRL) were proposed in the consultation document published on 10 February 2010, Proposed Maximum Residue Limit PMRL2010-10, *Chlorothalonil*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect as of the publication date of this document and are in addition to the MRLs already established for chlorothalonil.

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Chlorothalonil	2,4,5,6-tetrachloro-1,3- benzenedicarbonitrile, including the metabolite 4-hydroxy-2,5,6-trichloro- 1,3-benzenedicarbonitrile	0.08 0.02	Potatoes Sweet corn kernels plus cob with husks removed

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
