

## Evaluation Report for Category B, Subcategory 3.8 Application

**Application Number:** 2009-2976  
**Application:** Changes to product label: re-entry interval  
**Product:** Garlon Ultra Herbicide  
**Registration Number:** 28434  
**Active ingredient (a.i.):** Triclopyr, present as butoxyethyl ester  
**PMRA Document Number:** 2268526

### Purpose of Application

The purpose of this application was to amend the re-entry interval (REI) statement for non-crop uses on the Garlon Ultra Herbicide label to include “or until sprays have dried”.

### Chemistry Assessment

A chemistry assessment was not required for this application.

### Health Assessments

No post-application risks of concern to triclopyr are expected from non-crop use of Garlon Ultra Herbicide on the day of application. Given the specific post-application tasks required in non-crop areas, amending the REI statement to include “or until sprays have dried” for non-crop applications is not expected to result in unacceptable risks to workers.

### Environmental Assessment

An environmental assessment was not required from this application.

### Value Assessment

A value assessment was not required for this application.

### Conclusion

The PMRA conducted an evaluation of the subject application and determined the proposed label amendment is acceptable.

### References

None.
