

## Evaluation Report for Category B, Subcategory B 3.11 Application (New or Changes to Product Label – New Pests)

**Application Number:** 2015-0966  
**Application:** Category B, Subcategory B 3.11 (new pests)  
**Product:** Ares Herbicide  
**Registration Number:** 30188  
**Active ingredients (a.i.):** 33g/L imazamox/ 15 g/L imazapyr  
**PMRA Document Number :** 2551139

### Background

Ares Herbicide Solution is an agricultural herbicide registered for selective weed management in Clearfield® Canola, Clearfield® Canola Quality *Brassica juncea* and Clearfield® lentils, in the Prairie Provinces of Canada. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

### Purpose of Application

The purpose of this application was to amend the registration of Ares Herbicide Solution to include control claims for two new pests: chickweed and stork's bill, at presently labelled rates of application.

### Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

### Value Assessment

Chickweed and stork's bill are two weeds that are prevalent in western Canada and can be difficult to control. The value information provided for review included a summary of small plot research trial data which support a claim of control of chickweed and stork's bill with labeled rates of Ares Herbicide Solution.

### Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of Ares Herbicide Solution to include control claims for chickweed and stork's bill.
