

Evaluation Report for Category B, Subcategory 4.6 Application

Application Number: 2015-4326
Application: Submission to fulfill requirements of registration on a product with full registration
Product: Quadris Top
Registration Number: 30518
Active ingredients (a.i.): Azoxystrobin and Difenconazole
PMRA Document Number : 2578616

Background

Quadris Top (guarantee 220 g/L azoxystrobin and 125 g/L difenoconazole) was originally granted full registration for use in Canada in 2012. At the time of registration, outstanding confirmatory value requirements were identified.

Purpose of Application

The purpose of this application was to fulfill the outstanding value requirements for Quadris Top.

Chemistry, Health and Environmental Assessments

Chemistry, health and environmental assessments were not required for this application.

Value Assessment

Confirmatory value information was requested following the registration of certain claims on the Quadris Top label. Additional efficacy trials and scientific rationales were provided and were deemed sufficient to fulfil all outstanding requirements. Modifications to the current label were also made. Since alternative product are currently registered for control of Septoria leaf spot (*Septoria lycopersici*) on eggplant, ground cherry, pepino and tomatillo, the claim of suppression was amended to control and the maximum number of applications was increased from one to three to be consistent with the supported use on tomatoes and peppers. In addition, the claim of suppression of Cercospora leafspot (*Cercospora brassicae*) on *Brassica* was no longer supported by the registrant and was removed from the label. As such, no additional confirmatory value information is required for this claim.

Conclusion

The PMRA has completed a review of all available information for Quadris Top and has determined it sufficient to fulfill all of the associated outstanding value requirements.
