

Evaluation Report for Category B, Subcategory 2.4 Application

Application Number: 2018-0528
Application: Application to amend product chemistry; changes to the proportion of formulants
Product: Salmosan Vet
Registration Number: 32506
Active ingredients (a.i.): Azamethiphos
PMRA Document Number : 2954531

Purpose of Application

The purpose of this application was to amend the product specifications by changing the proportion of the formulants.

Chemistry Assessment

Salmosan Vet is formulated as a wettable powder containing azamethiphos at a concentration of 49.8 %. This end-use product has a density between 0.10 g/mL and 0.20 g/mL and pH between 3 and 7. The required chemistry data for Salmosan Vet have been provided, reviewed and found to be acceptable.

Health Assessments

Toxicological and occupational exposure assessments were not required for this application.

No new residue data for azamethiphos in farmed Atlantic salmon were submitted to support the change in formulation for Salmosan Vet. It was concluded that the formulation change does not represent health risks of concern for any segment of the population, including infants, children, adults, and seniors.

Environmental and Value Assessments

Environmental and value assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to support the formulation change for Salmosan Vet.
