

## Evaluation Report for Category B, Subcategory 3.11 Application

**Application Number:** 2007-5866  
**Application:** Category B, Subcategory 3.11 (New or changes to product labels-  
New pests)  
**Product:** Rode-Trol ®) Rodent Control Bait for Mice and Rats  
**Registration Number:** 28684  
**Active ingredients (a.i.):** cellulose  
**PMRA Document Number:** 1554949

### Purpose of Application

An application was submitted to amend the registration of the commercial class rodenticide, Rode-trol Rodent Control Bait for Mice (Reg. No. 28684; 42.75% cellulose from powdered corn cobs) to include the control of rats in buildings, warehouses, barns and empty feed storage areas. The applicant has also proposed a change in the product name to Rode-trol Rodent Control Bait for Mice and Rats as a result of the addition of the claim of rat control to the label.

### Chemistry, Health and Environmental Assessment

Chemistry, health and environmental assessments were not required as there was no change in the product chemistry and as the addition of the new pest to the label is not expected to increase health and environmental exposure.

### Value Assessment

Two laboratory trials were submitted which demonstrated that the proposed product is effective for killing rats at pellet sizes of 4.5 and 9.4 cm. A similar product is also registered for the control of rats in buildings, warehouses, barns and empty feed storage areas with similar use directions. The addition of the claim of rat control to the product label of Rode-trol Rodent Control Bait for Mice and Rats is acceptable.

### Conclusion

The PMRA has completed an evaluation of this application and has found the information sufficient to support the amendment of the label of Rode-trol Rodent Control Bait for Mice (Reg. No. 28684; 42.75% cellulose from powdered corn cobs) to include the claim of rat control and to the modify the product name to Rode-trol Rodent Control Bait for Mice and Rats.
