

Evaluation Report for Category B, Subcategory 4.6 Application

Application Number: 2020-3713
Application: Fulfill conditions of registration
Product: ASTOUND Fungicide
Registration Number: 29648
Active ingredients (a.i.): Cyprodinil, Fludioxonil
PMRA Document Number : 3286537

Purpose of Application

The purpose of this application was to fulfill the dietary exposure data requirement for ASTOUND Fungicide on lentils and amend the label to include all crops in Crop Subgroup 6C.

Health Assessments

Toxicology and occupational exposure assessments were not required for this application.

No new residue data were submitted for cyprodinil and fludioxonil to complete the data requirements to support the registration of Astound Fungicide on lentils, and to amend the label to include all crops in Crop Subgroup 6C. Rather, previously reviewed residue data from field trials conducted in/on dry peas and dry beans were reassessed in the framework of this application. Following the review of all available data, it is concluded that no change is required to the maximum residue limits (MRLs) established for fludioxonil in/on all crops in Crop Subgroup 6C (i.e., 0.5 ppm), or to the MRLs established for cyprodinil in/on all crops in Crop Subgroup 6C (i.e., 0.6 ppm). Furthermore, this action does not constitute a health risk of concern for acute or chronic dietary exposure (food and drinking water) to any segment of the population, including infants, children, adults and seniors.

Chemistry, Environmental and Value Assessments

Chemistry, environmental and value assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment, and has found the information sufficient to fulfill the requirement of registration for the product ASTOUND Fungicide and to amend the label to include all crops in Crop Subgroup 6C.
