

Evaluation Report for Category L, Subcategory 1.2 Application

Application Number: 2020-5083
Application: Submissions Subject to Protection of Proprietary Interests in Pesticide Data Policy - Equivalency/ Data Compensation Assessment
Product: BROMOXYNIL 240 EC
Registration Number: 32622
Active ingredient (a.i.): Bromoxynil
PMRA Document Number : 3291770

Purpose of Application

The purpose of this application was to amend the label of the registered product BROMOXYNIL 240 EC to include addition of use on durum wheat and carrots, addition of use as a pre-seed/pre-plant application prior to planting canola, and addition of tank mix partners and to add control of new pests through tank mixes, based on a registered precedent.

Value Assessment

Registration of a generic product may increase product competition, which may in turn reduce purchasing costs of similar products.

The formulation of BROMOXYNIL 240 EC was previously compared to the formulation of the cited precedent product at the time of registration. The differences between the two formulations were considered minor and unlikely to result in any significant impact on product performance, in terms of both efficacy and crop tolerance. Uses added subsequently to the precedent product label are supported for inclusion on the BROMOXYNIL 240 EC label, based on the original application to register BROMOXYNIL 240 EC.

Chemistry, Health and Environmental Assessments

Chemistry, health and environmental assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment and has found it sufficient to make the specified amendments to the label of BROMOXYNIL 240 EC.
