

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-5931
Application: New or Changes to the Product Label – Tank Mixes
Product: Gaucho 600 FL Insecticide
Registration Number: 27170
Active ingredient (a.i.): Imidacloprid
PMRA Document Number: 3527552

Background

Gaucho 600 FL Insecticide (Reg. No. 27170; registrant Bayer CropScience Inc.) is a seed treatment suspension insecticide containing 600 g/L imidacloprid for early season protection of canola, mustard (condiment-type only) and rapeseed seed and seedlings from flea beetles, and early season control of wireworms on field corn.

Purpose of Application

The purpose of the subject application is to add the general tank mixing statement to the product label.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the inclusion of the general tank mixing statement to be acceptable on the product label.
