PART 9 ENVIRONMENTAL TOXICOLOGY

DACO: 9.6.2.1

Title: Oral (LD50) Bobwhite Quail

Details: **The results of micro-flake study currently being conducted will determine potential for consumption of flakes by birds. If the results indicate that birds could consume enough flakes to cause toxicological effects from the co-incident consumption of verbenone, then an oral LD50 study for bobwhite quail will be required. If so, this study will require a range of treatments that allows for the calculation of a LD50 value for verbenone.**
