

## Evaluation Report for Category B, Subcategory 3.8 Application

**Application Number:** 2017-0331  
**Application:** Changes to Product Labels – Re-Entry Interval  
**Product:** Isofetamid 400SC Fungicide  
**Registration Number:** 31555  
**Active ingredient (a.i.):** Isofetamid  
**PMRA Document Number:** 2837621

### Purpose of Application

The purpose of this application was to revise the restricted entry interval (REI) for golf course turf use on the product label for Isofetamid 400SC Fungicide.

### Health Assessments

The postapplication exposure and risk to workers and golfers from the use of Isofetamid 400SC Fungicide was assessed. With the revised REI of “until sprays have dried”, no health risks of concern were identified for the use of isofetamid on golf courses. No health risks of concern are expected when workers follow the label directions and wear the personal protective equipment identified on the label.

Occupational and dietary exposure assessments were not required for this application.

### Chemistry, Value and Environmental Assessments

Chemistry, value and environmental assessments were not required for this application.

### Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to revise the REI for golf course turf use for Isofetamid 400SC Fungicide.
