

Evaluation Report for Category B, Subcategory 3.11 Application (New or Changes to Product Label – New Pests)

Application Number: 2018-1574
Application: Category B.3.11 (New or changes to product label – New pests)
Product: Rexade A Herbicide
Registration Number: 32520
Active ingredient (a.i.): halauxifen (present as methyl ester), pyroxsulam
PMRA Document Number : 2896618

Background

Rexade A Herbicide is registered for post-emergent control of annual grasses and broadleaf weeds in spring wheat, durum wheat, and winter wheat. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of this application was to amend the registration of Rexade A Herbicide to include claims of control of American dragonhead and henbit up to the bud stage and 15 cm in height.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

Value information submitted for review included data from field trials, which were conducted in the Prairie Provinces in 2016 and 2017. This information demonstrated that the application of Rexade A Herbicide can be expected to provide acceptable control of American dragonhead and henbit up to the bud stage and 15 cm in height.

Expansion of the weed spectrum on the Rexade A Herbicide label provides growers more flexibility to employ this herbicide for weed management in wheat.

Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to support the requested amendment to the registration of Rexade A Herbicide.
