

Evaluation Report for Category B, Subcategory 3.4 Application

Application Number: 2020-2184
Application: Changes to End-Use Product Label – Application Method
Product: RootX FDU WP Herbicide
Registration Number: 26435
Active ingredient (a.i.): Dichlobenil
PMRA Document Number : 3189415

Purpose of Application

The purpose of this application was to amend the label of RootX FDU WP Herbicide with new mixing instructions of the two components of the product to reflect the change in packaging.

Chemistry Assessment

A chemistry review was not required for this application.

Health Assessments

The changes in packaging and in mixing instructions of the end-use product RootX FDU WP Herbicide is not expected to result in potential residential exposure over the registered use of dichlobenil. No health risks of concern are expected when all label directions are followed.

Toxicology and food residue exposure assessment were not required for this application.

Environmental Assessment

The amendment to the registration of RootX FDU WP Herbicide to include a new “user blend bag” technology is not expected to pose any additional environmental risks when used in accordance with label directions.

Value Assessment

As there were no changes to the Directions for Use of the product, a value assessment was not required.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found it sufficient to support the new mixing instructions of the two components of the product to reflect the change in packaging to the label of RootX FDU WP Herbicide.
