

Evaluation Report for Category B, Subcategory 3.10 Application

Application Number: 2023-7176
Application: New or Changes to Product Labels-Tank Mixes
Applicant: Bayer CropScience Inc.
Product: Proline 480 SC Foliar Fungicide
Registration Number: 28359
Active ingredient (a.i.): Prothioconazole
PMRA Document Number: 3579797

Background

Proline 480 SC Foliar Fungicide (Reg. No. 28359; registered by Bayer CropScience Inc.) is a commercial suspension concentrate fungicide containing 480 g/L prothioconazole as its active ingredient.

Purpose of Application

The purpose of this application was to add the general tank mixing statement to the product label of Proline 480 SC Foliar Fungicide, in accordance with the latest PMRA guidance on tank mix labelling.

Chemistry, Health and Environmental Assessment

A chemistry assessment was not required since there was no change to product chemistry. Health and environment assessments were not required since the use pattern is unchanged.

Value assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with associated cost- and time-savings for the user.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the inclusion of the general tank mixing statement to be acceptable on the product label.
