DANGER POISON

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically. Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

DISPOSAL:

Do not reuse empty container. Wrap empty container and discard in household garbage.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN.

Avoid inhalation, eye and skin contact. Do not contaminate feed, food and drinking water. Cover fish bowls and remove pets for one hour when dusting rooms.

DIRECTIONS FOR USE

QUICK FACTS

This product is an insecticide powder which gives quick knockdown of the insects and kills them by dehydration. It is relatively odorless and non-staining and may be used according to directions in homes.

PESTS	For control of insects such as ants, bed bugs, fleas, cockroaches, silverfish, spiders, crickets and wasps
AREAS TO APPLY	FOR INDOOR USE ONLY. Underneath and behind stoves, refrigerators and appliances. On, around and behind molding, shelving, base boards, pipe openings, cracks, crevices and other areas where insects may hide. Mattress, particularly around seams and tufts. For wasps, apply directly to nests.

2014-0592
2014-08-28

HOW TO APPLY	<p>To apply dust, touch tip to surface, and squeeze the container to apply a lightly visible film. Ensure tip is fully closed after use.</p> <p>Apply a continuous visible film underneath and behind stoves, refrigerators and appliances. Treat on, around and behind molding, shelving, base boards, pipe openings, cracks, crevices and other areas where insects may hide.</p> <p>To control Bedbugs, take bed apart. Dust into joints and channels. If hollow, such as square or round tubing, see that the interior of framework is well dusted. Dust mattress thoroughly, especially tufts, folds and edges. Picture frame moldings and all crack and crevices in the room should be treated. Repeat as necessary.</p> <p>To control Wasps it is generally advisable to treat Wasp nests in the evening when insects are less active and have returned to the nest. Dust nest and entrance and surrounding areas where insects alight. For best results check nests carefully one or two days after treatment to ensure complete kill, then remove and destroy nest to prevent emergence of newly hatched insects. If removal is not feasible, retreat the nest if necessary.</p>
HOW MUCH TO USE	<p>Apply BAYER ADVANCED COMPLETE INSECT DUST at the rate of 60 grams per 10 square meters of surface area for all labelled pests except wasps.</p> <p>For Wasps, apply 0.25-0.5 grams of BAYER ADVANCED COMPLETE INSECT DUST per average size nest. To ensure adequate control of wasps in larger nests apply 1.0 - 2.0 g BAYER ADVANCED COMPLETE INSECT DUST.</p>
