NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

FIRST AID

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

Ingestion: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Skin or Clothing Contact: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

Eye Contact: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Inhalation: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to mouth, if possible. Call a poison control centre or doctor for further treatment advice.

TOXICOLOGICAL INFORMATION

Symptomatic and supportive therapy as indicated: no specific antidote is available.

Following ingestion, adsorbents such as activated charcoal may be of value. For larger quantities ingested, gastric lavage may be effective when performed within 4 hours of ingestion.

Ingestion by humans may produce non-specific symptoms, e.g. nausea, vomiting, abdominal pain, diarrhoea. Larger doses may cause disturbance of the nervous system with tremours, ataxia, weakness of limbs, convulsions, coma and death from respiratory depression.

Tefluthrin Technical Insecticide material is a practically non-irritant to skin. However, small traces on the skin may cause facial tingling/numbness (paraesthesia). It is not a strong skin sensitizer.

Tefluthrin Technical Insecticide is a moderate to severe eye irritant. It may cause marked sensory effects in the eye.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN AND UNAUTHORIZED PERSONNEL

Fatal if swallowed, absorbed through the skin, or inhaled. DO NOT get on skin and/or clothing. DO NOT inhale dust. Causes eye irritation. DO NOT get in eyes. Small traces on the skin may cause facial tingling/numbness (paraesthesia).

The minimum protective clothing for plant operators is a cap, safety goggles, overalls and work boots.

As Tefluthrin Technical Insecticide is a highly toxic semi-solid, operations with significant exposure will require PVC or nitrile rubber gloves and apron, a faceshield or goggles and rubber boots.

In manufacturing solid formulations, atmospheric dust concentrations must be maintained below the current hygiene standard by process enclosure or efficient local extraction. Where this is not possible, an approved air fed visor (or hood) or self contained breathing apparatus must be used.

Highly toxic to fish.

STORAGE

Store in sealed container in a secure, dry, ventilated area away from frost, direct sunlight and sources of heat and ignition.

SPILL CLEANUP

During decontamination, operators must wear protective clothing as described in the PRECAUTIONS section.

Small liquid spillages should be absorbed onto vermiculite or other inert absorbent and disposed of as toxic waste according to local or provincial regulations. See DISPOSAL section.

Dry spillage should be collected at once, by suction and treated similarly. The contaminated area should be washed down with cold water. Washings must be prevented from entering surface-water drains (to avoid harmful effects to fish in local water courses).

DISPOSAL

Canadian formulators of this technical should dispose of unwanted active and containers in accordance with municipal or provincial regulations. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill and for clean-up of spills.

***IN CASE OF EMERGENCY INVOLVING A MAJOR SPILL, FIRE OR POISONING
CALL 1-800-327-8633 (FASTMED)***

DIRECTIONS FOR USE

To be used only in the manufacture of insecticides registered under the Pest Control Products Act.
