BROMINATING GRANULES
CONTROLS BACTERIA AND ALGAE IN SPA & HOT TUB WATER

Peak Boost

DOMESTIC
ACTIVE INGREDIENT
Total Available Chlorine
(Present as Sodium Dichloro-s-Triazinetrione).....52.7%
Sodium Bromide.....14.7%
REG.NO. 28101 P.C.P. ACT

PRECAUTIONARY SYMBOLS

TRIANGLE
POISON
(SKULL)

TRIANGLE
CORROSIVE
(HAND)

CAUTION
POISON • CORROSIVE

WARNING POISON
MAY BE FATAL IF INHALED. DO NOT INHALE DUSTS
KEEP OUT OF REACH OF CHILDREN
READ LABEL BEFORE USING

NET CONTENTS
700G, 2KG

IMPORTED BY
ARCTIC SPAS • PO BOX560 THORSBY, ALBERTA • Canada T0C 2P0
1-800-309-1744

Secondary Panel

BROMINATING GRANULES

• Quick dissolving oxidation treatment • Completely soluble • Provides effective Bromine sanitation • Promotes water clarity • Eliminates organic waste such as perspiration, body oils, cosmetics, etc.

DIRECTIONS FOR USE:

One capful holds approximately 18 g.

1. Maintain recommended daily levels as determined by testing kit.

Free available chlorine: 3.0 - 5.0 ppm pH: 7.2 - 7.8

Total Alkalinity: 100 - 150 ppm Calcium Hardness: 100 - 200 ppm

2. With circulation system operating, add 6 g (approx. 1/3 capful) per 1000 L directly to bather-free water. Test for available bromine and repeat above dosage every 15-20 minutes until a residual of 3-5 ppm is reached.

3. Periodic superchlorination of spa water is recommended after heavy use, or once a week, in moderately used spas to remove organic waste. Add 25 g (approx. 1 1/3 capfuls) per 1000 L as often as required. Bathers should not enter the spa until residual reading drops to 6.0 ppm.

4. Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate spa water by adding 25g of Brominating Granules per 1000 L. Maintain circulation at least 30 minutes and wait 4 hours before using.

5. Brominating Granules contains stabilizer (cyanuric acid) which will accumulate in spa water. Keep stabilizer within the 30-100 ppm range by dilution with fresh water.

6. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the Maximum Number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.

7. Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes.

PRECAUTIONS:

• KEEP OUT OF REACH OF CHILDREN. • May be fatal if inhaled. DO NOT inhale dusts. • Strong oxidizing agent. May cause fire or explosion if contaminated. • Dangerous gas formed when mixed with acid. • Do not mix with

2019-1684

2019-10-04

any other chemical. • Avoid contact with skin and eyes. • It is recommended to wear rubber gloves when handling this product. • Harmful if swallowed. • Keep container closed and store in a cool, dry location. • Do not use this product with an electrolysis device (example: chlorine generator). • Do not use this product with ozonation. • Do not use this product with ultraviolet (UV).

FIRST AID: IF SWALLOWED, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF ON SKIN OR CLOTHING, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take container, label or product name and PCP registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Treat symptomatically.

DISPOSAL: Do not re-use empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
